Profile

I am a passionate frontend developer currently pursuing my Bachelor's in Computer Applications. I have a strong love for coding, especially in web development, and I am dedicated to creating visually appealing and user-friendly interfaces. I thrive on building beautiful and functional UIs and UX with clean, efficient code.

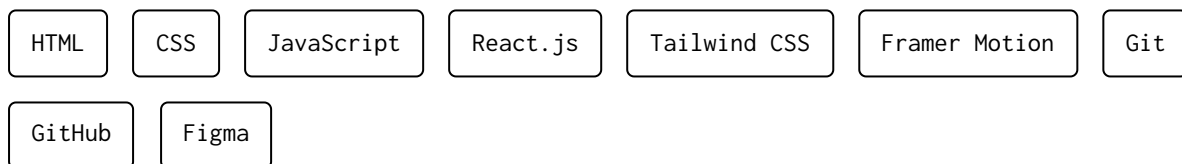

Professional Experience

ACE - Web Development Team Member

07/2023 - present

- Responsible for completing tasks assigned by mentors to support various projects and initiatives.
- Contribute to the overall growth and development of the society through active participation and collaboration.

Skills

Projects

Refokus - UI Clone

This project is a responsive website built with React.js and Tailwind CSS, featuring smooth animations powered by Framer Motion. The goal was to create an engaging user experience with seamless transitions and modern design practices. It was a rewarding experience to bring this project to life.

Built With - React.js, Tailwind CSS, Framer Motion

Typing Test Online

This project is a Typing Speed Test website built using vanilla JavaScript, CSS, and HTML. It allows users to test and improve their typing speed by typing a given random paragraph. Upon completion, users can analyze their performance by viewing their words per minute (WPM).

Built With - HTML, CSS, JavaScript

Career Path

Currently Working on it.

CareerPath is a comprehensive platform designed for students and industry professionals to help them navigate their career choices. It offers career roadmaps, job opportunities, a peer group community, and much more to support informed decision-making for a successful future.
